

This batch file is meant to be shared on a network. This can be done in the properties of the SWE file, utilizing the Share File option. Additionally, this batch allows users to upload, download, and post files of various types in directories, forums, inboxes, and a chatroom.

Most folders and files are hidden with the “ATTRIB +H” command, but are still accessible to the moderator and the batch script itself. This read me can be hidden from the server by moving it to another folder or with “ATTRIB +H”.

When informing the people on your network of this batch file, inform them of the shared path where the SWE file is saved. This is necessary for use of the batch script and will be asked at each start up.

Here is the directory and related sub-directories:

(tree /f /a >> README)

```
| README
| SWE-Batch.bat
|
\---Database
    | BugReport.txt
    | Moderator.txt
    | Reviews.txt
    | Track-Usage.txt
    | Users.txt
    |
    +---Art
        | ProfileArt-display.txt
        | ProfileArt-strings.txt
        |
    +---Blocked
    +---Blocked-Messages
    +---Chatroom
        | Chat-Viewer.bat
        | Chatroom-log.txt
        |
    +---Files
    +---Friends
    +---Images
    +---Messages
    +---Moderator
    +---Profiles
        | ProfileExample`~`.bat
        |
    +---Vids
    +---QNA
    \---Songs
```

SWE contents that are not hidden:

```
| README.pdf
| SWE-Batch.bat
|
\---Database
  +---Files
  +---Images
  +---Songs
  \---Vids
```

There is a secret Moderator's Tab. This is accessible by going to Profiles, View all profiles, Option 3, and typing: "ThreeInksModTab". No parentheses though. Here, backups can be created without deleting user data. This does clear up storage space for external storage and recovery. Though recovering is not possible from within the batch script itself.

File permissions of individual files and folders can be edited with the usual Windows file managing GUI- but defaults allow compatibility and user preferences to work when opening files from the shared directories.

If you intend to redistribute this script and associated folders,  
I ask that you do not modify this code prior to redistribution.

Code completed: December, 07th 2022
